

Inleiding

Voor het opstellen van deze lijst werd gebruik gemaakt van het gecommuniceerd geneesmiddelenrepertorium 2006 en zijn aanpassingen in de Folia Pharmacotherapeutica. Als het geneesmiddel dat je zoekt niet op deze lijst voorkomt kan dit omdat:

- het geneesmiddel niet in de bovenstaande referentie is opgenomen
- het een buitenlands product is
- het een nieuw geneesmiddel is
- je een onjuiste spelling gebruikt
- je zoekt naar de generische naam en niet naar de merknaam

Als het geneesmiddel dat je zoekt niet op deze lijst voorkomt kan je steeds kijken naar de lijst van de verboden substanties en nagaan of één van de substanties die in je geneesmiddel aanwezig zijn op deze lijst voorkomt. Je kan ons ook mailen of je kan je arts of apotheker contacteren.

De lijst van geneesmiddelen staat alfabetisch gerangschikt.

Uitleg codes

Wanneer de code "OK" achter de merknaam is vermeld, betekent dit dat dit geneesmiddel geen verboden substanties bevat.

De geneesmiddelen die ten allen tijde (zowel binnen als buiten wedstrijdverband) verboden zijn, zijn weergegeven op een rode achtergrond.

De geneesmiddelen die enkel binnen wedstrijdverband verboden zijn, zijn weergegeven in een oranje achtergrond.

De geneesmiddelen die in bepaalde sporten verboden zijn zijn aangegeven op een gele achtergrond. Het betreft de bètablokkers. Zij zijn enkel verboden binnen wedstrijdverband in de volgende sporten: autosport, biljart, bobslee, bowling, bridge, curling, gymnastiek, handboogschieten (ook verboden buiten wedstrijdverband), jeu de boules, moderne vijfkamp (alleen bij schietonderdelen), motorsport, schaken, schieten (ook verboden buiten wedstrijdverband), skiën (bij schansspringen en freestyle snowboard), worstelen, zeilen (alleen voor stuurlieden in het matchracen) en zwemmen (schoonspringen en synchroonzwemmen).

De geneesmiddelen aangegeven op een lichtblauwe achtergrond zijn toegelaten maar kunnen toch aanleiding geven tot een positieve dopingcontrole. **Voor deze geneesmiddelen is GEEN toestemming wegens therapeutische noodzaak vereist.**

Het betreft hier:

"topische" corticosteroiden die gebruikt worden voor aandoeningen van de huid, neus, oor, mond of oog
of geneesmiddelen die codeïne bevatten wat mogelijk kan omgezet worden tot morfine in het lichaam
of geneesmiddelen die adrenaline bevatten in combinatie met lokale anesthetica of voor lokaal gebruik.

Het gebruik van eender welk geneesmiddel dient bij eventuele dopingcontrole zeker gemeld te worden aan de controlearts.

De categorieën van verboden middelen:

S	stimulantia
N	narcotica
A	anabole middelen
B2	bèta-2-agonisten
H	hormonen en verwante stoffen
HMan	hormonen en verwante stoffen die enkel voor mannen verboden zijn
AO	middelen met anti-oestrogene werking
M	maskerende middelen
D	diuretica
B	bètablokkers
C	glucocorticosteroiden

Belangrijke opmerkingen:

1. adrenaline, in combinatie met lokale anesthetica of voor lokaal gebruik (bijvoorbeeld nasaal of oogheelkundig) is toegelaten.
2. topische glucocorticosteroiden zijn niet verboden als zij gebruikt worden voor aandoeningen van de huid, neus, oor, mond of oog.

Vanzelfsprekend wordt het gebruik van alle geneesmiddelen hierboven onder 1 en 2 vermeld, aan de controlearts gemeld bij eventuele dopingcontrole en op het proces-verbaal van monsterneming genoteerd.
